

In the Claims:

Please amend Claim 1 as follows:

1. (Amended) A reclosable package having a top, bottom, and sides, said package comprising:

a first wall and a second wall opposite to said first wall;

a first zipper profile having a first interlocking member and a first flange portion, said first flange portion being attached to said first wall along a line extending substantially from side to side of said package;

B-1
a second zipper profile having a second interlocking member engageable with said first interlocking member and a second flange portion, said second flange being attached to said second wall along a line extending substantially from side to side of said package; and

no slider claimed
at least one of said walls and flange portions forming a wall segment beyond the attachment line of said wall to its associated flange portion, said segment extending over said

profiles' interlocking members to form a ^{7.34}joinder with an opposite one of said segments, said
6.36 + 112 1st p.m. (implies the "segments" alone provide the frang. conn.)
joinder providing a frangible connection to provide a tamper-evident feature for said reclosable

package.
